

Preface

Special Volume: Observation, Prediction and Verification of Precipitation (EGU 2008)

S. C. Michaelides

Meteorological Service, Cyprus

This special volume comprises mostly papers that were presented at the General Assembly of the European Geosciences Union (EGU), held in Vienna, Austria, from 13 to 18 April 2008, under the session entitled “Observation, Prediction and Verification of Precipitation (General Session)”. The contributors to this session were invited to submit a short paper with their findings for publication in this volume. All the papers that were submitted were reviewed by two independent anonymous reviewers. The reviewers from the international community offered their services in order to finalize this volume and the editor wishes to express to them his appreciation. I also thank the staff of the Copernicus Publications – Production Office for their collaboration.
